

## Brandon B. Harris

### Risk Control Consultant / Risk Management

Brandon Harris is a loss control/risk management consultant for InterWest Insurance Services, Inc. Brandon's primary focus is to provide the clients of InterWest with Cal/OSHA consultation support, safety program development, compliance, implementation and employee safety training. Some of his specialties include Cal/OSHA compliance audits, Disaster Preparedness & Response, First Aid & CPR Training, Sexual Harassment Prevention Training, Fleet Safety, Office & Industrial Ergonomics, national (TIPS) trainer for alcohol service providers, property inspections and much more.

Brandon is a Chico native whose family spans back many generations in the North State as local farmers, school teachers and dentists. He has planted his own stake in the North State, with a family of his own; Mari his wife and two lovely daughters Mackenzie 8 and Kaylee 2. Over the years, he has dedicated himself to local community involvement, public safety and education. He has carried this same passion over to InterWest and to the clients he serves.

Brandon has a large variety of experience from which to draw. Prior to joining the InterWest team, he spent 20+ years in public safety, education and fire & rescue as an officer for the Butte County Sheriffs' Search & Rescue Team. He is currently very active as their OTE Training Officer. His experience also extends extensively into Law Enforcement with an additional background in the medical field as an Emergency Medical Technician (EMT). Brandon also has 15 years of experience as a business owner both in the food and alcohol service industry and construction industry.

He is an active member of the American Society of Safety Engineers (ASSE), through which has achieved certificates in Safety Management I & II as well as Corporate Safety Management as part of his Certificate in Safety Management (CSM). Brandon strongly believes in better servicing his clients through continuing education. He continually attends seminars and work shops in order to continue to expand his knowledge base and to keep current with regulator changes.
