

## Dante Bellino

### Risk Control Consultant

Dante Bellino is a Risk Control/Risk Management Consultant for InterWest Insurance Services. He provides clients with a hands-on approach to employee safety prevention and risk management. He is dedicated to sustaining an employer's safety program by finding ways and opportunities to integrate loss control, risk management, and employee safety into the production and operations of day-to-day business.

Dante's background includes working with acute care, convalescent & long term rehabilitation facilities, large medical clinics, universities, community colleges, K-12 schools, JPAs, museums, non-profit entities and employers involved in general industry. He has developed training targeted at facility-specific issues, i.e., wheelchair transfers/body mechanics to reduce sprain and strain injuries to employees, as well as a forced choice audit survey to determine the effectiveness of their current safety culture. He has also worked with clients

to prepare tailored risk management services to fit customer needs and to overcome unique risk issues and statutory requirements as well as with the implementation of agreed solutions.

Dante is a graduate of California State University in Sacramento, CA, and has both a Bachelor of Science and Master's degree. He is an active Professional Member of the American Society of Safety Engineers (ASSE) and has completed the course work to obtain a Certificate in Safety Management and Corporate Safety Management. He is well versed in OSHA, CAL-OSHA, Workers' Compensation, Disaster Response, Fair Employment & Housing and ADA. This broad depth of knowledge enhances his expertise in property and casualty risk management, employee safety, employee wellness and workers' compensation.
